

**ISY Information on the H1N1 Virus**

*If you have been following the news, Myanmar has reported cases of the H1N1 Flu virus. Our Medical Office and the administrators are aware of these recent confirmed cases of the H1N1 virus in Myanmar, and we are monitoring the situation closely. If necessary, and in consultation with the US Embassy, ISY will determine appropriate and informed courses of action if the virus becomes a threat to the health and safety of ISY families. Currently, we are reviewing preventative health measures to help safeguard all of our students entering the campus starting August 14, 2017.*

*If the situation warrants further action steps, we will contact you. If your child is feeling feverish or is showing signs of influenza, please do not send them to school. It is much better for the child to recover at home.*
